It's all about food safety. The global food industry supply chain continues to tighten regulations on lubricants used in food-processing, packaging, handling and storage to ensure the safety and well-being of consumers, in addition to complying with government guidelines.

Fehr Food Grade lubricant is an **NSF H1** qualified multi-purpose, high purity calcium sulfate food grade lubricant that provides long lasting grease protection with superior heavy-duty metal to metal characteristics. This lubricant is excellent for high load applications requiring a long grease life. It will resist water and heat and has a wide temperature range of -40F to +550F. Provides rust corrosion protection and superior lubrication to a wide variety of applications.

L6940 Fehr Food Grade Lubricant meets the highest **H1** standard and is suitable for use on chains, winches, conveyors, gears, cables, hinges, pins, levers, rollers, ovens, dryers, threads, bearings, O-rings, linkages, pumps and valves in bakeries, bottlers, breweries, canneries, dairies, egg processors, meat and poultry processors, pharmaceutical manufacturers and food processing plants or wherever incidental contact with food may occur.

Fehr has earned a solid reputation for offering high quality products and has been providing trusted professional grade lubricants for over 30 years. Give us a call and discuss how Fehr lubricants can work for you.
