

Grade 100 Chain is made from high strength alloy steel that provides approx. 25% higher working loads than Grade 80 chain, and is more resistant to fatigue and abrasion. The increased strength to weight ratio allows for the use of smaller diameter chain depending on the application.

Designed for the high demands of overhead lifting applications, it is also an excellent chain for use in recovery, towing, and load securement.

Our Grade 100 chain is coated in special blue E-coating to provide increased life and corrosion resistance without affecting the strength of the chain. Fehr Grade 100 Chain is made to NACM guidelines and meets/exceeds the requirements of OSHA and ASTM standards.

Fehr Part #	Size (in)	WLL(lbs)	FT/Drum	Wt/Ft	Finish
20S250-0400	1 / 4	4,300	400	.782	Blue E Coated
20S312-0550	5 / 16	5,700	550	1.00	Blue E Coated
20S375-0400	3 / 8	8,800	400	1.552	Blue E Coated

*\* Use only Grade 50/60 S/S, Grade 80 or Grade 100 chain for overhead lifting.*
